

WE HAVE RE-STARTED

Safety of the health of our customers, team-members and partners is of paramount importance to us. Gradually and cautiously we have re-started our operations in the safe mode. Being a responsible and ISO certified organisation, we have already implemented safety guidelines in our offices and production units. Moreover, we shall be implementing the following health & safety procedures while working at your location during the installation process.

We have taken all the precautionary measures at the work places:

- Temperature checks
- Proper sanitization

- Use of mask & gloves
- Following social distance

Health Checks & Record:

Team members are remotely scanned for body temperature before entering the factory / office, while leaving at end of day and before leaving for installations. All team members are due to take Covid test by "ICMR approved Rapid test kit" before moving out of work place. All data are recorded on daily basis. Daily reporting of wellness through ArogyaSetu app is mandatory.

Physical Distancing:

All the seating and work place arrangements have been redesigned and appropriately demarcated as per government guidelines and suitable markings are incorporated. Teams are re-rostered, every week, and called based on requirements at work place else they are advised to work from home.

Team Hygiene:

All the team members maintain hand sanitization at all the time of work hours at work place as well as installation sites.

Post Production Sanitization:

After the production the elements are appropriately sanitized (through UV or Disinfectants) and then packed for shipments on a sanitized delivery vehicle.

Work Place Sanitization:

Sanitizing and disinfecting the production area, raw materials and delivery vehicles regularly.

Safety Precautions:

Our team members wear masks, face shield, hand gloves while at work irrespective of work place or installations.
